Engineering

**ACCREDITATION**
Inspection of buildings & structures

**CLASS 1**
Environmental engineering: EIA & SPZ

**Full cycle**— from surveys and engineering through construction to turnkey commissioning. Transport, energy, oil & gas and industrial infrastructure across Kazakhstan and Russia: chief project engineers, design engineers, surveyors, estimators, foremen and signalling engineers working on projects that serve for decades.

## SECTORS

- **Railways & roads**
- **Pipelines**
- **Power lines & low-current systems**
- **Industrial facilities**
- **Engineering networks**
  gas · water supply · sewerage · power · heat supply

## OUR MISSION

**To build reliable infrastructure for the future of Kazakhstan.** Operational safety, durability and precise adherence to schedules are commitments we set in every contract. Technical discipline and engineering precision are the foundation of our reputation.

## OUR APPROACH

**One contract — one party accountable.** The group delivers the entire cycle in-house: engineering surveys, engineering and working documentation, clearance through the State Expert Review (GosExpertiza), construction & installation works and commissioning. Timelines and quality are backed by Category I licenses and state accreditations of the authorized bodies.

## GROUP LEGAL ENTITIES

*All divisions operate under unified management and a shared quality policy: Category I licenses, state accreditations valid through 2028 and end-to-end control at every stage — from engineering through commissioning.*

# Over sixteen years of work

> *The infrastructure that carries the nation's economy, the networks that power its cities, the industrial facilities that sustain production — across the regions of Kazakhstan and beyond.*

# Engineering and site surveys

**100**

ENGINEERING WORKS IN THE REGISTRY

**Category I license** for engineering activities since 2010. A complete engineering documentation package for the State Expert Review (GosExpertiza) — roads and railways, trunk pipelines, power transmission lines, industrial facilities and engineering networks.

### Comprehensive engineering surveys

Geodetic, geological, environmental, hydrological and archaeological surveys to substantiate engineering decisions.

### Industrial facilities

Process engineering of plants, factories and industrial production complexes.

### Residential & civil buildings

Engineering of residential and civil buildings and structures in line with applicable codes and standards.

### Transport infrastructure

Engineering of transport, communications and utility facilities, including road and railway infrastructure.

### Engineering systems & networks

Engineering documentation for utility systems: power, water and heat supply, sewerage and low-current networks.

### Reconstruction & strengthening

Structural engineering for the reconstruction of buildings and structures and the strengthening of load-bearing elements.

## PROJECT WORKFLOW STAGES

**I — Surveys**
Geodesy · geology · hydrology

**II — Engineering docs**
Engineering-estimate & working documentation

**III — State Review**
GosExpertiza approval

**IV — Author supervision**
Construction oversight · technical supervision

# Construction & installation works

**32**

CIW PROJECTS IN THE REGISTRY

**Category I license** for CIW since 2010. Construction across five infrastructure sectors — from roads and railways to trunk pipelines, power transmission lines, industrial facilities and engineering networks.

### Construction, major repair & reconstruction

Full-cycle construction, major repair and reconstruction of production and industrial facilities.

### Cost estimation

Preparation of estimate documentation and costing of construction & installation works to current norms.

### PPR, GPR & POS development

Work execution plan, work schedule and construction organization plan.

### Engineering support

Support of industrial construction: contractor coordination and schedule and quality control.

### Technical documentation management

Maintenance and support of the full package of construction technical documentation.

### Handover & commissioning

Organization of handover and commissioning procedures and liaison with supervisory authorities.

## ON-SITE WORK STAGES

**I — Preparation**

Mobilization · temporary utilities

**II — Earthworks**

Excavation · embankment · subgrade preparation

**III — Superstructure**

Track panel · surfacing & pavement · installation

**IV — Handover & start-up**

Commissioning · acceptance certificate

PROJECT SHOWCASE

# Rail welding plant of PZTM LTD LLP

**PZTM LTD LLP · rail welding plant** · Aktobe city, Astana district · Kyzgaldakty station

● DELIVERED

Construction and installation works on the railway infrastructure of the PZTM LTD rail welding plant at Kyzgaldakty station in Aktobe: construction of railway tracks, a connecting-track junction, culvert structures, and the relocation of communication and power networks within the construction zone.

**9.504** km
CONSTRUCTION OF RAILWAY TRACKS

**0.527** km
CONNECTING-TRACK JUNCTION AT KYZGALDAKTY STATION

**8.3** km
UTILITY NETWORK RELOCATIONS

## COMPLETED WORKS

- Construction of railway tracks — 9.504 km
- Junction of the connecting track to the Kyzgaldakty station track — 0.527 km
- Two Ø1.0 m reinforced-concrete culverts, 20 m each (stations 3+03 and 3+35)
- Subgrade drainage works
- Reconstruction of the electric interlocking equipment
- Relocation of signalling cable lines out of the construction zone
- Lighting of turnouts No. 24 and No. 26 · electrical installation
- Power supply for the signalling point at station 17684+79
- Relocation of the KTZ national railway overhead communication line
- Relocation of Dalsvyaz communication networks in the construction zone
- Relocation of the signalling and power divisions' utilities

# External railway access track to the QazCement Industries plant

✓ DELIVERED

**QazCement Industries LLP · junction at Kenzhaly station, KTZ**

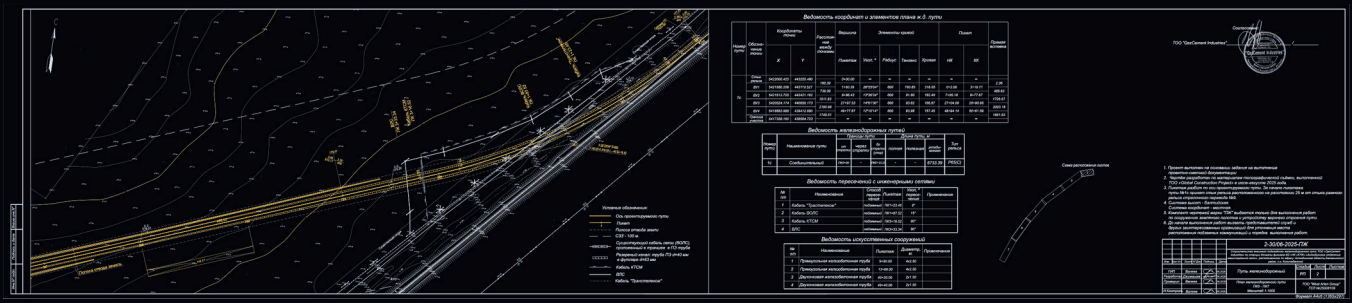

Aktobe region, Baiganin district, Koltabansky rural district

Detail design of a category III-p external access railway from Kenzhaly station to the cement plant site: R65 rails, culvert structures, subgrade drainage, crossings of trunk fibre-optic and hot-box-detector cables. Several junction options for the external track were developed, with the optimal one selected for delivery. The construction cost was optimised from 2,288.7 down to 1,902.7 mln ₸. A separate project delivered the plant's external power supply — 24 MW, a 110/10 kV substation and a 110 kV overhead line.

# Kolesoprokatnaya station and utilities for Ural Steel JSC

✓ DELIVERED

**Ural Steel JSC · 360,000 railway wheels per year complex**

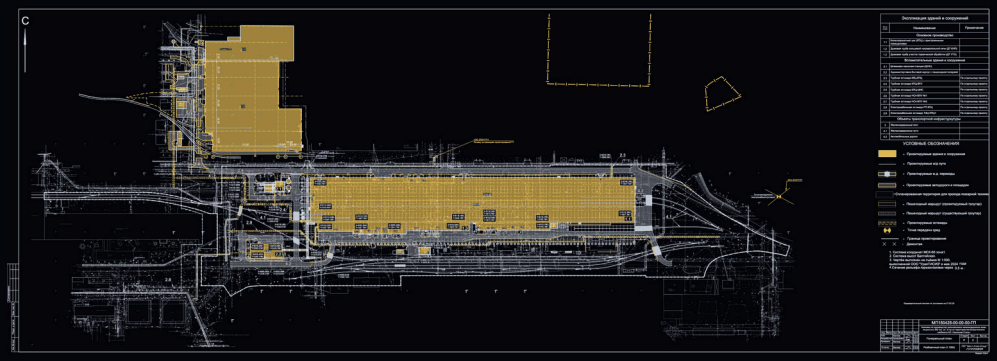

Novotroitsk, Orenburg region, Russian Federation

Integrated design of the new wheel-rolling complex station: demolition of the existing Marten station and its relay-based interlocking, construction of the Kolesoprokatnaya station with conversion to computer-based interlocking (CBI) covering 68 turnouts of the 1/7 type, turnout air-blowing and a combined two-storey modular interlocking post. The same project delivered the station utilities — 0.4 kV power, outdoor lighting (61 masts, 2,217 m of cable), water supply and drainage.

**68** turnouts

# Sorting tracks and wagon repair base at Khorgos Gateway dry port

✓ DELIVERED

**KTZ national railway · Khorgos — Eastern Gates dry port**

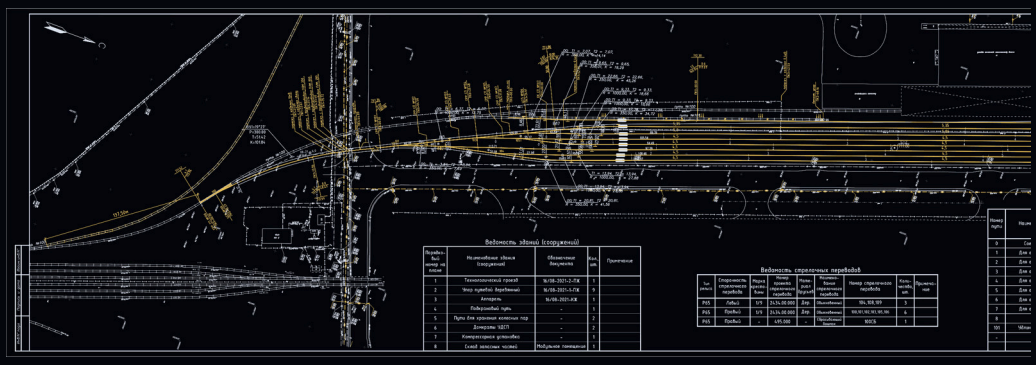

Khorgos — Eastern Gates SEZ, Almaty region · Chinese border

Detail design for ten sorting railway tracks and an uncoupled wagon repair base at the Khorgos — Eastern Gates dry port, the largest dry port on the Kazakh-Chinese border. Category II-p tracks on R65S rails with 1/9 turnouts — 7,981 m of track development. The project also covers an unloading ramp for self-propelled machinery, the relocation of crossed utilities and 10/0.4 kV networks, and a yard public-address system. Designed to the technical conditions of the KTZ national railway.

**10** tracks
SORTING RAILWAY TRACKS

UNCOUPLED WAGON REPAIR BASE

**8** km
TRACK DEVELOPMENT · 7,981 M IN TOTAL

Track development plan, 1:1000 · turnout throats and sorting tracks

RAILWAY TRACK · 16/08-2021

Track development plan, continued · sorting tracks and buffer stops

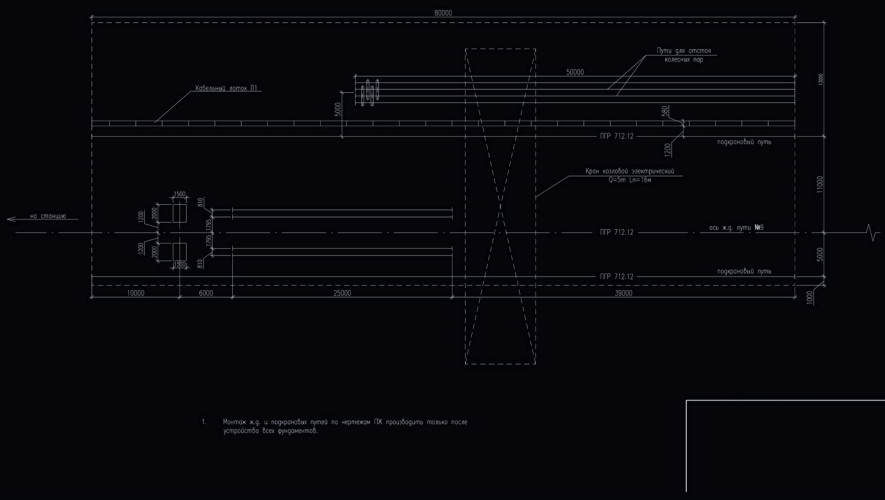

RAILWAY TRACK · 16/08-2021

## SCOPE OF WORK

- Ten sorting tracks · R65S rails, R65 1/9 turnouts, category II-p
- Protection of water, sewerage and storm mains: steel casings Ø426–1,020 mm
- Crushed-stone ballast with Tensar geogrid
- Repair base: 296 m track, unloading ramp, modular staff building and spare-parts warehouse
- 10/0.4 kV networks in concrete troughs · 23 m lighting masts · base power supply
- On-site water supply and drainage networks · yard public-address system

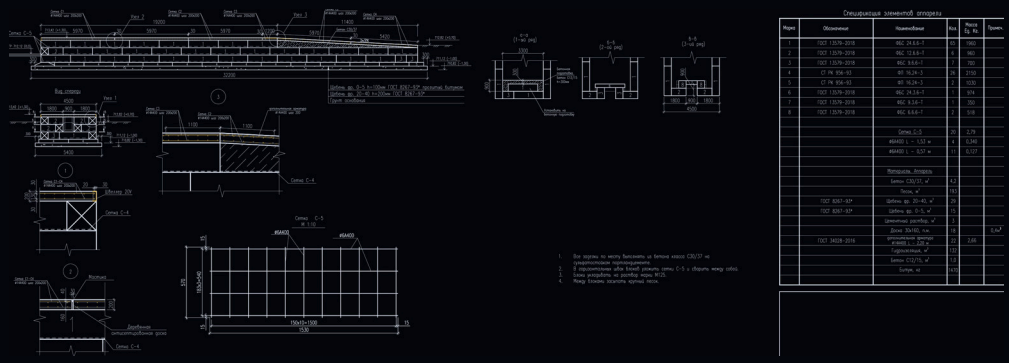

Detail design · KTZ technical conditions No. 3334-i of 03.12.2020 · ref. 16/08-2021

# Uncoupled wagon repair base

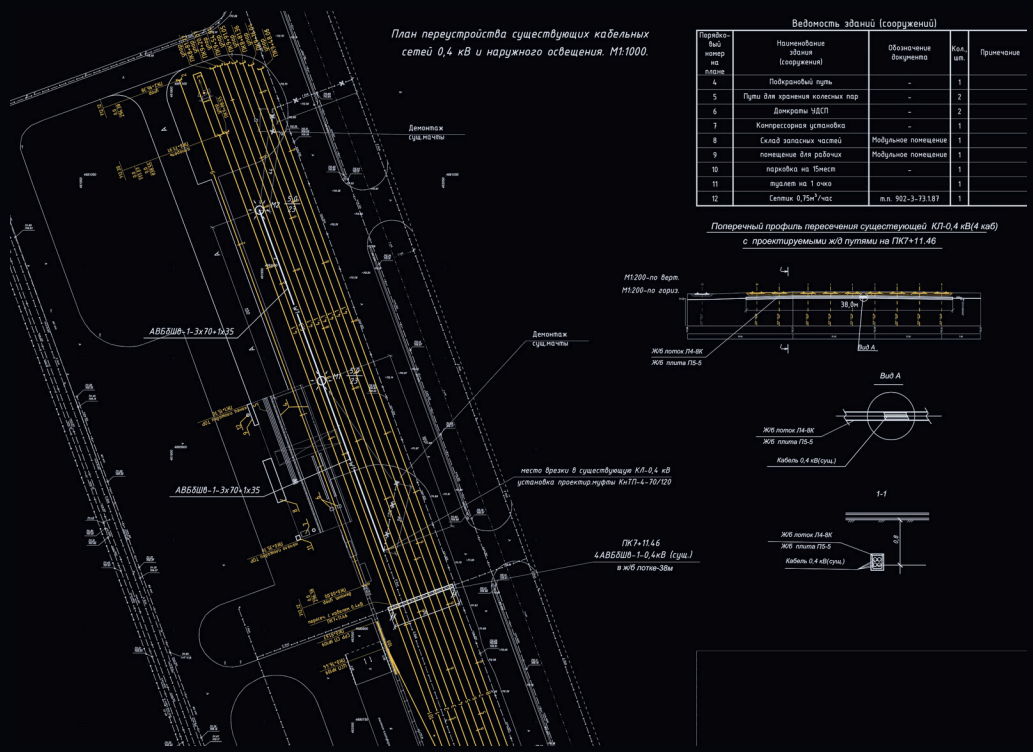

Repair base site plan, 80×30 m · 5 t gantry crane with a 16 m span, crane runways, wheelset storage tracks · 21 types of monolithic foundations

**REPAIR BASE SITE · 16/08-2021-2-AS**

Unloading ramp for self-propelled machinery, 32.2 m long · FBS block layout, details and specification, monolithic slab with channel edging

**RAMP · 16/08-2021-1-AS**

0.4 kV and outdoor lighting relocation plan, 1:1000 · cable lines in concrete troughs, 23 m lighting mast relocation

**POWER SUPPLY · 16/08-2021-0-ES**

# Wagon stabling tracks and Rudnaya station reconstruction (AMK)

✓ DELIVERED

**Aktobe Copper Company LLP · Kyzyl-Kain — Rudnaya section** ·

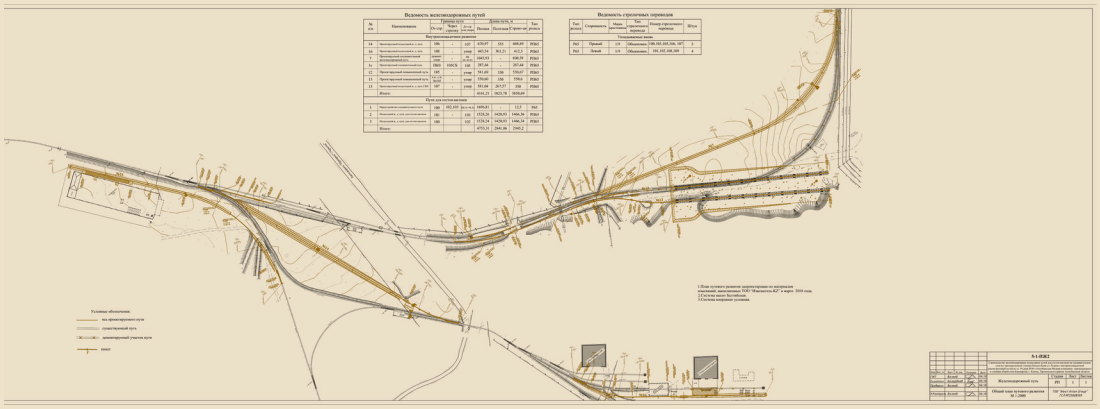

Koktau village, Khromtau district, Aktobe region · junction at Kempirsai station

Detail design of railway stabling tracks on the connecting section between the Kyzyl-Kain industrial station and Rudnaya station, with on-site reconstruction of the Rudnaya station tracks of the Aktobe Copper Company. The junction connects to Kempirsai station of the national network.

**8.9** km
TRACK DEVELOPMENT · NEW TRACKS AND RECONSTRUCTION

General track development plan, 1:2000 · stabling tracks, elevated tracks, track and turnout schedules

RAILWAY TRACK · 5-1

Left part of the general track development plan · approach and connecting tracks

RAILWAY TRACK · 5-1

## SCOPE OF WORK

- New access, connecting and elevated tracks · 4.2 km, R65
- Wagon stabling tracks and connecting-track rebuild · 4.8 km
- On-site reconstruction of Rudnaya station tracks
- Nine R65 1/9 turnouts · junction at Kempirsai station

Detail design · general track development plan, 1:2000 · ref. 5-1

# Access track with an elevated unloading track for Neftestroyservis LTD

✓ DELIVERED

**Neftestroyservis LTD LLP (NSS) · junction at Tendyk station, KTZ**

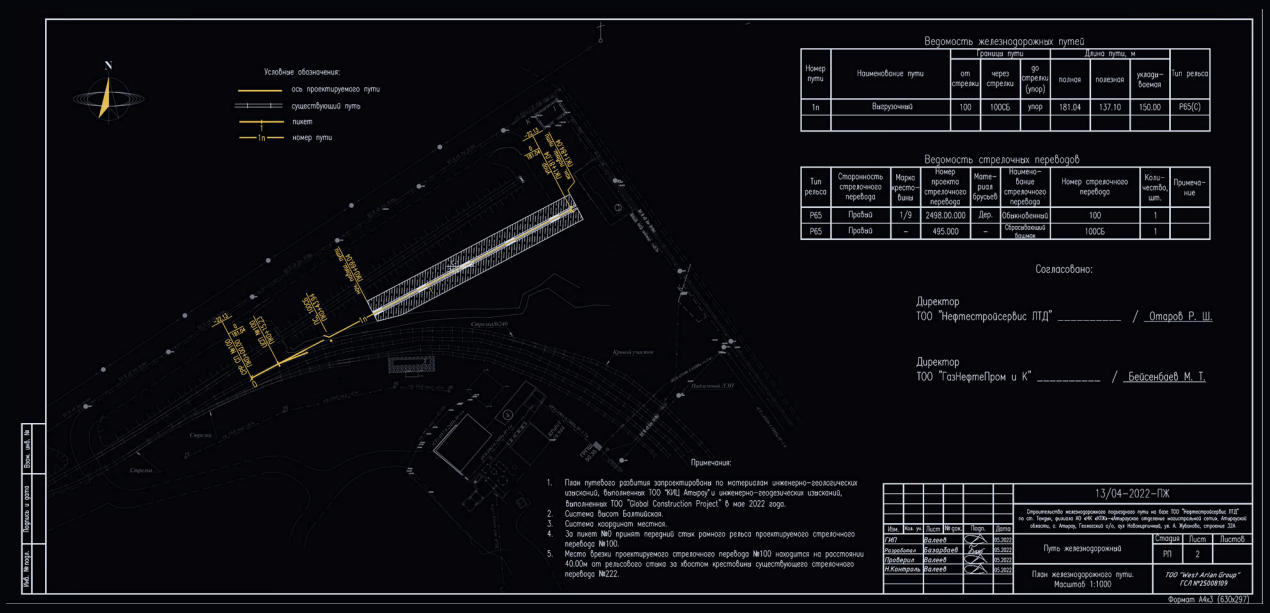

Atyrau region, Atyrau city, Novokirpichny aul · KTZ Atyrau mainline division

Detail design of the access track for Neftestroyservis LTD at Tendyk station of the KTZ Atyrau division: a 181 m unloading track on R65S rails tied in 40 m from the existing turnout, and a 2.2 m elevated track of FBS blocks on a monolithic slab. The site lies at -22.13 m; groundwater with 27 g/l mineralisation is aggressive to concrete and steel, so W8 concrete and bituminous protection are used.

**181 m**

**W8**
CONCRETE GRADE FOR AGGRESSIVE GROUNDWATER

Railway track plan, 1:1000 · track and turnout schedules, tie-in to the Tendyk station throat

RAILWAY TRACK · 13/04-2022

Elevated track block layout, sections and specification · FBS blocks, monolithic slabs Pm1–Pm3

ELEVATED TRACK · 13/04-2022

## SCOPE OF WORK

- 181 m unloading track · R65S · R65 1/9 turnout and derailer
- 6 m wide concreted unloading apron
- 2.2 m elevated track: FBS blocks on a monolithic slab · C16/20 W8 F200 concrete
- Tie-in among live gas and power lines

Detail design · refs 13/04-2022-PZh and 13/04-2022-KZh · May 2022

# Access track to the Sintez Ural blending plant

DELIVERED

**Sintez Ural LLP · 20,000 t/year blending plant** ·

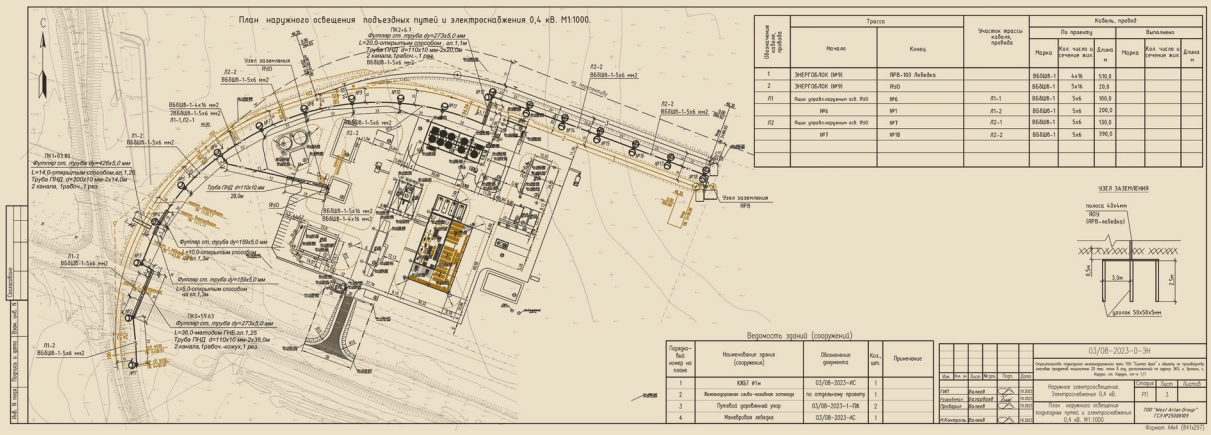

West Kazakhstan region, Uralsk, Kardon · Kardon station

Integrated detail design of the access railway to the new blending plant: 0.8 km of track on concrete sleepers — R65(S) rails with Vossloh fastenings, a Ø1.0 m culvert under the existing road, a level crossing and a shunting winch. The project also delivered the 0.4 kV power supply with outdoor track lighting; the crossed gas main, water main and 10 kV cable were cased and inspected.

**0.8** km
TRACK DEVELOPMENT · R65(S), CONCRETE SLEEPERS

Plan, continued · Isatay station throat, extension of station tracks No. 10 and 11

RAILWAY TRACK · 01/03-2022

## SCOPE OF WORK

- 440 m unloading track · R65S · R65 1/9 turnout and derailer
- Elevated track for unloading inert materials
- Extension of station tracks No. 10 and 11 · dismantling of old R50/R43 tracks
- 0.4 kV power and lighting networks · protection of the existing communication line

Detail design · refs 01/03-2022 (track, elevated track, power, communications) · KTZ TC No. 1009-I

# Track into the rail mill's cold finished-product warehouse

✓ DELIVERED

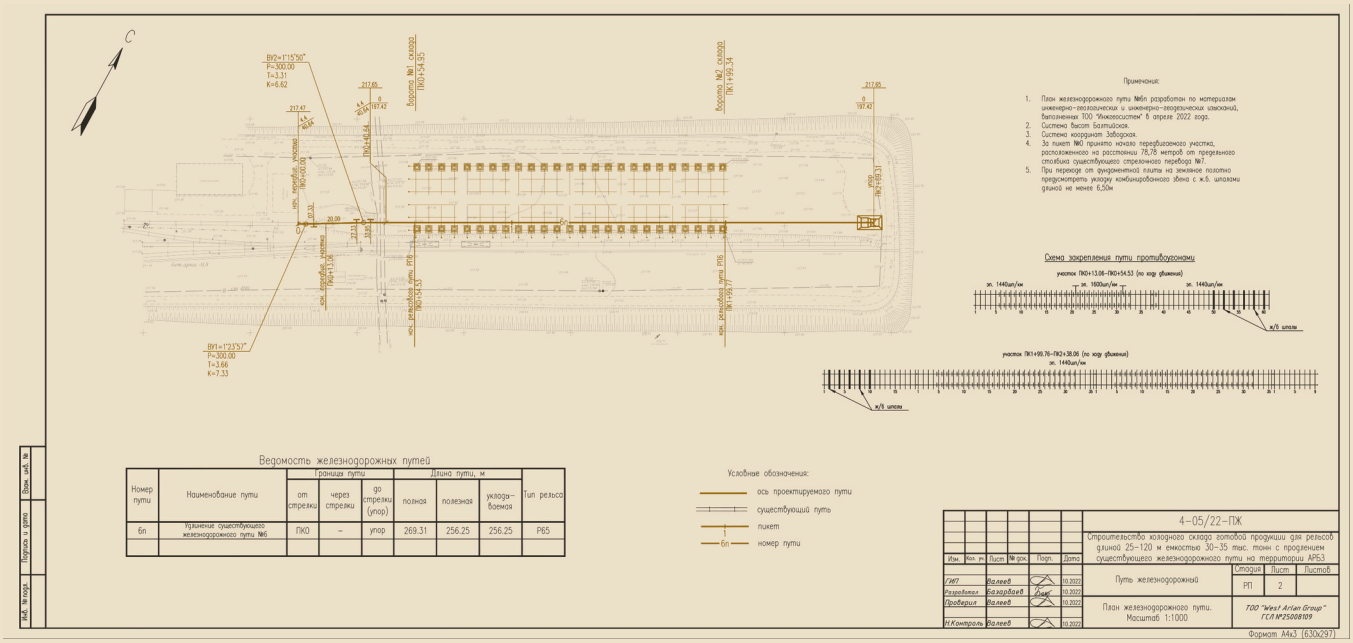

**ARBZ LLP · Aktobe rail-and-beam mill** · Aktobe city · ARBZ plant site

Detail design extending the plant's existing track No. 6 into a new cold warehouse for finished products — rails from 25 to 120 m long, with a storage capacity of 30–35 thousand tonnes. The 269 m R65 track runs through the warehouse gates: an in-building rail way on a foundation slab, a combined span with concrete sleepers at the slab-to-subgrade transition, and anti-creep anchoring.

**269 m**
EXTENSION OF TRACK NO. 6 · R65 RAILS

**25–120 m**
FINISHED RAILS STORED IN THE WAREHOUSE

**30–35 kt**
COLD WAREHOUSE CAPACITY

Railway track plan, 1:1000 · track led into the cold warehouse, anti-creep anchoring schemes

RAILWAY TRACK · 4-05/22

## SCOPE OF WORK

- Extension of existing track No. 6 · 269 m, R65 rails, timber sleepers
- Track led into the warehouse through the gates · rail way on a foundation slab
- Combined span with concrete sleepers at the slab-to-subgrade transition
- Anti-creep anchoring · buffer stop · drainage into concrete troughs

Detail design · ref. 4-05/22 · October 2022

# 102 km ore haulage road for KazGeorud LLP

✓ DELIVERED

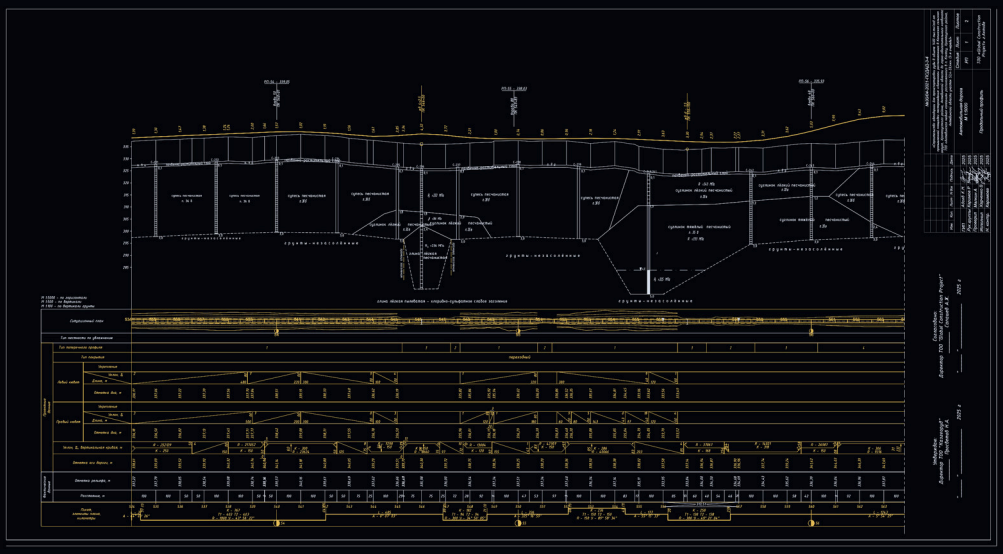

**KazGeorud LLP · Limannoe deposit** · Aktobe region · Koktau village — Limannoe deposit

Design of a 102 km category III motor road from Koktau village to the Limannoe deposit — built to haul 1,400 thousand tonnes of ore per year. The project includes an overpass on piled supports across the Samara — Shymkent republican highway, minor culvert structures, and the relocation of crossed power, communication and gas networks.

**102** km

## SCOPE OF WORK

- Connection points: 110/10 kV substation, AGRS-300, Ilek water intake, PS-24
- Power 3.9 km · gas 0.62 km · water 8.4 km
- Sewerage 5.3 km · road 0.43 km · railway 1.81 km
- Three connection schemes · optimal option by cost and schedule

Pre-design study · three utility connection options · optimal option selected

# What our clients say

Our clients' own words are the truest measure of our work. Letters of appreciation accumulated over years of cooperation confirm what we set in every contract: quality, adherence to schedules and accountability at every stage.

> "The company staff resolved the many issues that arose during construction promptly and to a high standard. **West Arlan Group** patiently coordinated every subsequent construction stage with the management of Aktobe Copper Company LLP. We recommend them as a reliable team for projects of any complexity."
>
> **Aktobe Copper Company LLP** N. S. Bondarenko · General Director · September 21, 2018

> "We would like to note the professionalism and responsibility of **West Arlan Group** staff, as well as the efficiency with which issues were resolved during construction. A high level of organization allowed the facility to be commissioned to a high standard and on time."
>
> **Sintez Ural LLP** S. A. Morozov · Director · Since November 2024

> "The work was performed in accordance with applicable building codes and regulations, the technical specification and the terms of the contract, to proper quality and within the established deadline. **West Arlan Group** has proven itself a highly professional company."
>
> **Neftestroyservis LTD LLP · NSS** R. K. Otarov · Director · November 1, 2022

> "Throughout our cooperation, the routine maintenance of the access railway tracks has been carried out by qualified specialists. All defects are remedied properly and on time. The professionalism of **West Arlan Group** staff gives us confidence in safe operation."
>
> **Aktobe Industrial Zone LLP** A. N. Tulebayev · Director · January 5, 2020
